

Drug overdose continues to be a leading cause of death in the United States but less than 25% of individuals with substance use disorders (SUD) receive treatment.¹

The Maryland Addiction Consultation Service (MACS) launched in 2017 to support healthcare providers and teams in caring for patients with SUD and chronic pain. Since then, MACS has expanded to address the rapidly evolving overdose epidemic and strengthen the Maryland healthcare workforce.

Our team of addiction medicine experts, including infectious disease, pain management, and OBGYN specialists, offer the following services:

SERVICE	DETAILS	OUTCOME	IMPACT & REACH
PHONE CONSULTATION <i>Since 2017</i>	Clinical questions, resources, and referral information	1,568 Consultations	✓ <i>Many providers received support with: Fentanyl & benzodiazepine withdrawal treatment strategies, co-occurring disorders & perinatal SUD</i>
EDUCATION <i>Since 2017</i>	Trainings on substance use and chronic pain for CE credit	250 Trainings 11,500+ Attendees	650+ Hours of education Over 95% of respondents will apply what they learned to practice
ECHO CLINICS <i>Since 2020</i>	Virtual learning communities for a variety of medical settings	97 Sessions 1,319 Attendees	✓ <i>Based on participant interviews: Increased confidence & improved attitudes regarding SUD care²</i>
TECHNICAL ASSISTANCE <i>Since 2020</i>	Support for healthcare teams to implement or expand SUD services	571 Meetings, visits, calls & trainings	100+ Teams received tailored support
